
Internet Assisted Review (IAR) Version 4.1.1.4 Release Notes

New Features

Final Score Sheet Button Visible but Disabled Outside of Final Scoring

Prior to this release, the **Final Score Sheet** button appeared for reviewers on the *List of All Applications* screen only during the period of final scoring (as set in *Control Center* by the SRO).

To make reviewers more familiar with the location of this button, IAR has been modified to display the **Final Score Sheet** button on the *List of All Applications* at all times. With this release, the button will be visible but disabled except during the final scoring time period, when the button will become enabled for use.
