Extramural Trainee Reporting and Career Tracking (xTRACT) Version1.3.3.1 Release Notes

Fixes

Users with Multiple Roles now have the Ability to Access all Appropriate Grants

Previously users with multiple roles such as Signing Official (SO) and an Assistant (ASST) or a Principle Investigator (PI) and an Assistant (ASST) could not access all the appropriate grants.

This issue has been resolved.

Now the SO who is delegated as an ASST can search for one PI's grants by choosing a delegator, or search for all grants at the institution by leaving the delegator name blank, when executing a training grant search.

Similarly, the PI who is delegated as ASST for another PI can search for the other PI's grants by choosing that person as delegator, or search for all grants (his/her own plus any delegators') by leaving the delegator name blank when executing a training grant search.

PDF Output is now Outputting Correctly

Under certain isolated conditions, it was possible for a renewal PDF to be generated with errors that prevented it from being opened properly.

The issue has been resolved.

Training table PDFs No Longer Split Trainee information across page breaks

Previously when generating training table 8 in the PDF, if there were trainee information that extended beyond the end of one page, the remaining information for that trainee would be continued at the top of the next page. This in turn caused the person's name to appear twice across the page breaks – once at the bottom of the preceding page and once at the top of the subsequent page.

This cosmetic issue has been resolved. Any trainee whose information cannot fit within the remaining space on a page will be presented at the top of the next page, rather than being split between pages.
