
Internet Assisted Review (IAR) Version 3.9.0.11 Release Notes

New Features

New System Timeout Warning Pop-Up

A new pop-up warning message appears on top of any maximized window five minutes before the standard 45-minute IAR user session is about to time out. The pop-up includes a countdown of minutes left before you will be automatically logged off IAR.

If you wish to continue working in your IAR session, select the **Continue** button.

You can select the **Logout** button if you are no longer working in IAR and would like the system to log you out. If you do opt to logout, please remember to manually close any other pop-up windows that might have been left open.

NOTE: eRA currently tests and supports Internet Explorer 8 and 9 and Mozilla Firefox 28+.

For those using Safari as your browser, this feature may not work as described above.
