

Extramural Trainee Reporting and Career Tracking (xTRACT) Version 1.3.2.0 Release Notes

New Features

New Pop-up Spinner Screen Displays when Preparing an RPPR, Renewal, or Revision

When the **Prepare for RPPR**, **Prepare for Renewal**, or **Prepare for Revision** hyperlink is clicked on the Search for Training Grants screen, the system now displays a pop-up *Spinner* on the screen notifying the user that the data preparation is in progress and asking the user to wait until the process is complete. Once the *Spinner* disappears the work may start on the newly established Research Training Dataset (RTD).

Fixes

Tables 8A and/or 8B now Displaying when Previewing the PDF

Previously tables 8A and/or 8B were not being generated when previewing the PDF file even though there were pre-doctoral and post-doctoral trainees that should have been displayed.

This issue has been resolved.

The Unfinalize Option is now Available after Finalizing an RTD

Previously the **Unfinalize** option was not available after finalizing a Research Training Dataset (RTD) on the appropriate xTRACT screen. This option should have been available to users having the permission to unfinalise an RTD for a Research Performance Progress Report (RPPR), Revision, or a Renewal that has been marked as final.

This issue has been resolved. The **Unfinalize** option is now available.

All Faculty Research Support now Displaying when Previewing the PDF

Previously not all a faculty member's research support was displaying from the *Participating Faculty Detail* screen when the **Preview PDF** option was selected and the contents of table 4 (*Research Support of Participating Faculty Members*) was reviewed.

This issue has been resolved. Now all the appropriate research support listed for a faculty member is displayed when previewing the PDF's contents.
